

Muirhead Active Hygiene Leather.

Sustainable natural leather from Muirhead with built-in antiviral properties, providing best in class hygiene.

ViralOff® technology from Polygiene®, integrated at the manufacturing stage, delivers a sustainable natural material that eliminates 99% of bacteria and viruses* from leather surfaces within two hours.

All the performance and sustainability benefits of our fine Scottish leather, with added antiviral properties.

Polygiene® ViralOff® technology is fully integrated during the leather manufacturing process to permanently protect.

An immediate solution to the challenges of Covid-19, enhancing the hygiene and protection of your leather.

Our supplied marketing communications increase customer confidence in the safety and hygiene of your leather.

SELF-DISINFECTING

99% virus free within two hours of any viral contact, even without cleaning.

ALWAYS WORKING

Treatment is always-on, built-in to the leather as part of our sustainable manufacturing process.

PROVEN PROTECTION

Tested to reduce viruses by over 99% – including SARS-CoV-2, H3N2 and H1N1 (ISO18184:2019).

CUSTOMER CONFIDENCE

The reassuring benefits and reduced risks are easily communicated.

SPEEDS UP CLEANING

Self-disinfecting leather removes the need for additional sanitising of your leather.

PROVEN DURABILITY

Tested to 50,000 cycles on the Martindale abrasion rub test (ISO 12947-2).

NO COMPROMISES

The same reliable Muirhead supply chain and lead times as always.

SUSTAINABLE BY NATURE

The world's lowest carbon leather, treated using silver recovered from end of life electronic products.

*SARS-CoV-2, H3N2 and H1N1 - according to ISO18184:2019. Polygiene® ViralOff® does not prevent diseases but protects the treated material.
